Tabs

Product Description

Color box-tertiary contains 63 tablets that are divided into 9 compartments. Each compartment contains 7 gradations of each of the primary, secondary and tertiary colors, and they are: red, blue, green, yellow, orange, purple, brown, pink, and grey. All the tablets are packed in a wooden box that is made of good quality polished wood and non toxic dyes that are durable, termite proof and completely safe for children to use.

Purpose

- To provide the child with lesson on color orientation
- To develop the chromatic sense
- The provide basic intelligent, tasteful and aesthetic appreciation and application of colors
- To prepare the child on understanding the symbolic utilization of colors

Exercise

- Start by taking out the tablets and placing them on the mat
- Remove one color compartment that are of different shades and randomly lay them on the mat
- Find the darkest and lightest tablets and set them next to each other to point out the difference of extreme shades.
- Place those two tablets back in the set.
- TPick the darkest of the tablets and proceed to the next lighter shade and follow till the lightest of the shade and place them in order.
- Invite and encourage the child to participate in choosing the shade or a color and let him/ her

place the tablet at the correct place.

- Now pick the next compartment and proceed with the exercise as before.
- Allow the child to perform this exercise individually and monitor his/ her work.
- Assist the child in arranging the shades of colors when necessary.

Related Exercises

The concept of gradation (of difficulty) has been introduced to the child without a conscious effort from the day one under practical life exercises such as spooning, pouring, transferring etc. The concept of gradation learnt by the child with this material is a conscious and concrete effort to understand the same.

This knowledge eases and helps him to understand the varieties of gradation applied in other materials such as touch boards where the child learns grades of surfaces, grading sounds from loudest to softest under sound boxes, grading thermic bottles from hottest to coldest, grading fabrics according to textures, grading different grades of paper. It lays the foundation for understanding the hierarchies under mathematics.

Product Maintenance

- Store in dry and room temperature.
- Do not expose to direct sunlight.
- Do not touch the coloured area
- Hold on to the frame to prevent fading of colour.

Why to buy from us?

Sustainable Wood

All our products are made from sustainable wood.

Handcrafted

All our products are handcrafted by our talented artisans.

Non-Toxic Paint

Safety of kids using our products is our top priority thus we only use non-toxic paint.

Made In India

All our products are made in India by talented Indian craftsman.

ASTM F963

EN71 and ASTM F963 Certified

All our products comply EN71 and ASTM F963 standards.

Turn Key Solutions

We offer turn key solutions to meet various needs of schools.
